

## ***CONSTRUCTION OF HEAD END BUILDING INITIATED ON 11/28/17***

The new head end building will house the critical equipment that will control the distribution of Hotwire's fiber services throughout Shadow Wood. It is located just west of the SWCC/SWCA Maintenance Facilities on Oakwilde Boulevard across from the Country Club. These pictures show the initial work to prepare the surrounding area and build the forms in preparation for pouring the building's foundation.
